17<sup>th</sup> March 2022

Dear Parent/Carer

We have been made aware of several members of our setting who have tested positive for COVID 19. We are continuing to monitor the situation and are working closely with our local Public Health team. This letter is to inform you of the current situation and provide advice on how to support your child.

Our setting remains open, and your child should continue to attend if they remain well.

## **What to do if your child develops symptoms or tests positive for COVID-19**

If your child develops symptoms of COVID-19, they should self-isolate and book a PCR test as soon as possible. This can be arranged via <https://www.gov.uk/get-coronavirus-test> or by calling 119.

Typical symptoms of COVID-19 are a new, continuous cough, or a high temperature, or a loss of, or change in, their normal sense of taste or smell (anosmia).

Please note that we have seen that the additional symptoms of an upset stomach, runny nose, headache, sore throat, unusual fatigue (tiredness) or cold-like symptoms could be early warning signs of a potential COVID-19 infection.

If your child develops symptoms of COVID-19, they should get a PCR test and remain at home at least until the result is known.

- If the PCR test is negative, the child can return to the setting once well again
- If the PCR test is positive, the child should follow [Government guidance](#) for people with Covid-19

If your child does develop COVID-19 symptoms, you can seek advice from the NHS at

<https://www.nhs.uk/conditions/coronavirus-covid-19/check-if-you-have-coronavirus-symptoms/>.

If you are concerned about your child's symptoms, or they are worsening you should contact NHS 111 at <https://111.nhs.uk/> or by phoning 111.

## **How to help to stop COVID-19 spreading**

There are things you can do to help to reduce the risk of you and anyone you live with getting ill with COVID-19:

- get vaccinated – everyone aged 12 and over can [book COVID-19 vaccination appointments](#) now or attend a drop-in site. See <https://www.blmkccg.nhs.uk/drop-in> for clinic locations and times.

- get tested and stay at home if you have symptoms
- stay at home and avoid contact with other people if you test positive
- consider taking a test even if you do not have symptoms
- wash your hands with soap and water or use hand sanitiser regularly throughout the day
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards
- meet people outside and avoid crowded areas
- open doors and windows to let in fresh air if meeting people inside
- wear a face covering when it's hard to stay away from other people – particularly indoors or in crowded places – and on school/public transport

Further information is available at
